- Seeds are used in water treatment plants to clean contaminants
- ...

Utilization of natural products of plant origin having fewer side effects has gained popularity over the years. There is immense scope for natural products that can intimate health benefits beyond traditional nutrients. **Moringa oleifera** is one such tree having tremendous nutritional and medicinal benefits. It is rich in macro- and micro-nutrients and other bio-active compounds which are important for normal functioning of the body and prevention of certain diseases. Leaves, flowers, seeds, and almost all parts of this tree are edible and have immense therapeutic properties including anti-diabetic, anti-cancer, anti-ulcer, anti-microbial, and anti-oxidant. Most of the

recent studies suggested that Moringa should be used as a functional ingredient in food.

Moringa is a prominent source of nutrients and antioxidants. Like other vegetables such as spinach and fenugreek, Moringa leaves are not as popular all over the world, but currently, it is used as substitutes in soups, lentils, and other preparations in Southeast Asia. Still there is a knowledge gap in potential uses of Moringa as a food supplement and food fortification. Moringa has enormous potential uses but is very less explored. It can be utilized to make foods that could be a step towards curbing malnutrition. The published literature gives the total scenario of the chemical constituents, nutritional content, potential uses, and pharmacological activities of the plant. The identification, isolation, and standardization of plant extracts may be considered for detailed studies which can be useful for the further development of the promising food products with health benefits and nutrients to cure different life style-related diseases as well as malnutrition.

Cautions:

- Avoid Moringa from India which may be GMO treated (non Organic) and inconsistent quality.
- Pregnant women should consult their doctor.
- Persons using medications for high blood pressure should not combine with **Moringa**
